

## The Blundell Archive

### “P” Numbers

The following is a list of “P” numbers used by Blundell to identify not only slide rules but also the many other products manufactured over the years. Reproduced from the only known list it may perpetuate typographical errors found in the original document. It should also be noted that it appears probable that many of the numbers were allocated to products that reached no further than the quotation stage and therefore the existence of a “P” number is no proof of the existence of a product.

The index runs to approximately October, 1998. Numbers marked \* exist in the Blundell Archive

The following is a list of abbreviations where these are known.
