

Lawrence/Engineering Instruments OEM Range

The nature of *Original Equipment Manufacturer* models makes compiling a list tricky. However, often OEM models attributed to Lawrence were made by *Festus/Acu-Rule Mfg. Co.* - in particular their confusing model 10-D. Some big name makers chose to OEM source their basic models from makers like Lawrence. However, common OEM models most often wrongly attributed to Lawrence/Engineering Instruments are:

- **Keuffel & Esser** (K&E) model: N4058W
- **DIETZGEN** models: 1767/68/69P
- **POST** model: 1446-D
